RG1_n01677712 Overview blade

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The left sidebar shows the 'Resource groups' section with a list of resource groups: RG1-n01677712 and RG2-n01677712. The main content area displays the 'Overview' blade for RG1-n01677712. The 'Essentials' section shows the subscription (Sub-a), subscription ID (595d7107-0a89-4e2f-84fb-7ec71eb18f31), and location (Australia East). The 'Resources' section shows a table with 0 records.

Name	Type	Location
------	------	----------

RG2_n01677712 Overview blade

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The left sidebar shows the 'Resource groups' section with a list of resource groups: RG1-n01677712 and RG2-n01677712. The main content area displays the 'Overview' blade for RG2-n01677712. The 'Essentials' section shows the subscription (Sub-b), subscription ID (65ec2b8a-3541-4c4b-ac58-0b813896e8be), and location (UK South). The 'Resources' section shows a table with 0 records.

Subnets

Name ↑↓	IPv4 ↑↓	IPv6 ↑↓	Available IPs ↑↓	Delegated to ↑↓	Security group ↑↓	Route table ↑↓
vnet1-subnet1	10.10.0.0/24	-	251	-	vnet1-nsg	-
vnet1-subnet2	10.10.1.0/24	-	251	-	vnet1-nsg	-

Overview of subnet1

The screenshot shows the 'Edit subnet' page in the Microsoft Azure portal. The left sidebar displays the navigation menu with 'Subnets' selected. The main content area shows the configuration for 'vnet1-subnet1'. The 'Subnet ID' is '/subscriptions/595d7107-0a89-4e2f-84fb-7ec71eb18f31/resourceGroups/RG1-n01677712...'. The 'Subnet purpose' is 'Default'. The 'Name' is 'vnet1-subnet1'. The 'IPv4' section is expanded, showing 'Include an IPv4 address space' checked. The 'Starting address' is '10.10.0.0', the 'Size' is '/24 (256 addresses)', and the 'Subnet address range' is '10.10.0.0 - 10.10.0.255'.

Overview of subnet2

The screenshot shows the 'Edit subnet' page in the Microsoft Azure portal for 'vnet1-subnet2'. The left sidebar displays the navigation menu with 'Subnets' selected. The main content area shows the configuration for 'vnet1-subnet2'. The 'Subnet ID' is '/subscriptions/595d7107-0a89-4e2f-84fb-7ec71eb18f31/resourceGroups/RG1-n01677712...'. The 'Subnet purpose' is 'Default'. The 'Name' is 'vnet1-subnet2'. The 'IPv4' section is expanded, showing 'Include an IPv4 address space' checked. The 'Starting address' is '10.10.1.0', the 'Size' is '/24 (256 addresses)', and the 'Subnet address range' is '10.10.1.0 - 10.10.1.255'. The 'IPv6' section is also visible but not expanded.

Overview of vnet1-nsg

The screenshot shows the 'Overview' page for 'vnet1-nsg' in the Microsoft Azure portal. The left sidebar displays the navigation menu with 'vnet1-nsg' selected. The main content area shows the overview of the network security group. The 'Location' is 'Australia East', and it is 'Associated with' '2 subnets, 0 network interfaces'. The 'Subscription ID' is '595d7107-0a89-4e2f-84fb-7ec71eb18f31'. The 'Tags' section shows 'Add tags'. Below this is a table of 'Inbound Security Rules'.

Priority	Name	Port	Protocol	Source	Destination	Action
100	AllowAnyHTTPIbound	80	TCP	Any	Any	Allow
110	AllowAnyRDPInbo...	3389	TCP	Any	Any	Allow
120	AllowAnyCustom443...	445	Any	Any	Any	Allow
65000	AllowVnetInBound	Any	Any	VirtualNetwork	VirtualNetwork	Allow
65001	AllowAzureLoadBalan...	Any	Any	AzureLoadBalancer	Any	Allow
65500	DenyAllInBound	Any	Any	Any	Any	Deny

Overview of RG2-n01677712

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The left sidebar contains a navigation menu with options like Home, Activity log, Access control (IAM), Tags, Resource visualizer, Events, Settings, Cost Management, Monitoring, Automation, and Help. The main content area displays the Overview page for the Resource Group RG2-n01677712. It includes a search bar, a list of resources (vnet2 and vnet2-nsg), and a table showing the details of these resources.

Name	Type	Location
vnet2	Virtual network	UK South
vnet2-nsg	Network security group	UK South

Overview of subnet blade

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The left sidebar contains a navigation menu with options like Home, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Settings, Address space, Connected devices, Subnets, and Bastion. The main content area displays the Subnets blade for the Virtual Network vnet2. It includes a search bar, a list of subnets (vnet2-subnet1 and vnet2-subnet2), and a table showing the details of these subnets.

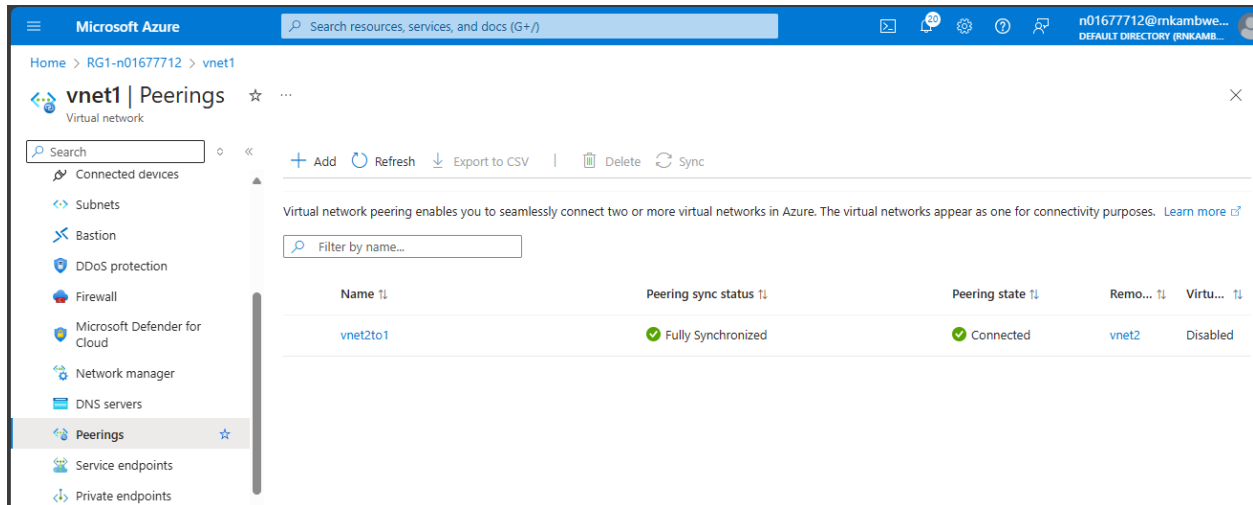

Name	IPv4	IPv6	Available IPs	Delegated to	Security group	Route table
vnet2-subnet1	10.20.0.0/24	-	251	-	vnet2-nsg	-
vnet2-subnet2	10.20.1.0/24	-	251	-	vnet2-nsg	-

Peering vnet1 to vnet2

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The left sidebar contains a navigation menu with options like Home, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Settings, Address space, Connected devices, Subnets, Bastion, DDoS protection, Firewall, Microsoft Defender for Cloud, Network manager, and DNS servers. The main content area displays the Peerings blade for the Virtual Network vnet2. It includes a search bar, a list of peerings (vnet1to2), and a table showing the details of these peerings.

Vnet2-nsg overview

The screenshot displays the 'vnet2-nsg' overview page in the Microsoft Azure portal. The left-hand navigation pane includes links for Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, and Settings (with sub-links for Inbound security rules, Outbound security rules, and Network interfaces). The main content area features an 'Essentials' section with metadata: Resource group (RG2-n01677712), Location (UK South), Subscription (Sub-b), and Subscription ID (65ec2b8a-3541-4c4b-ac58-0b813896e8be). It also shows 'Custom security rules: 1 inbound, 0 outbound' and 'Associated with: 2 subnets, 0 network interfaces'. Below this is a table of 'Inbound Security Rules' with columns for Priority, Name, Port, Protocol, Source, Destination, and Action. The table lists four rules: 'AllowAnySSHInbo...' (Priority 100, TCP, Any to Any, Allow), 'AllowVnetInBound' (Priority 65000, Any to VirtualNetwork, Allow), 'AllowAzureLoadBalan...' (Priority 65001, Any to AzureLoadBalancer, Allow), and 'DenyAllInBound' (Priority 65500, Any to Any, Deny).

Priority	Name	Port	Protocol	Source	Destination	Action
100	AllowAnySSHInbo...	22	TCP	Any	Any	Allow
65000	AllowVnetInBound	Any	Any	VirtualNetwork	VirtualNetwork	Allow
65001	AllowAzureLoadBalan...	Any	Any	AzureLoadBalancer	Any	Allow
65500	DenyAllInBound	Any	Any	Any	Any	Deny

Vnet1-nsg | subnets

The screenshot shows the 'vnet1-nsg | Subnets' page in the Microsoft Azure portal. The left-hand navigation pane is similar to the previous screenshot, with 'Subnets' highlighted. The main content area displays a table of subnets associated with the vnet1-nsg. The table has columns for Name, Address range, and Virtual network. Two subnets are listed: 'vnet1-subnet1' with address range 10.10.0.0/24 and 'vnet1-subnet2' with address range 10.10.1.0/24, both associated with the 'vnet1' virtual network.

Name	Address range	Virtual network
vnet1-subnet1	10.10.0.0/24	vnet1
vnet1-subnet2	10.10.1.0/24	vnet1

Vnet2-nsg | subnets

The screenshot displays the 'vnet2-nsg | Subnets' page in the Microsoft Azure portal. The left-hand navigation pane is similar to the previous screenshots, with 'Subnets' highlighted. The main content area shows a table of subnets associated with the vnet2-nsg. The table has columns for Name, Address range, and Virtual network. Two subnets are listed: 'vnet2-subnet1' with address range 10.20.0.0/24 and 'vnet2-subnet2' with address range 10.20.1.0/24, both associated with the 'vnet2' virtual network.

Name	Address range	Virtual network
vnet2-subnet1	10.20.0.0/24	vnet2
vnet2-subnet2	10.20.1.0/24	vnet2

Management Group Hierarchy

The screenshot shows the 'Management groups' page in the Microsoft Azure portal. The left sidebar contains 'Overview', 'Get started', and 'Settings'. The main content area has a search bar and a list of management groups and subscriptions. A table lists the following items:

Name	Type	ID	Total subscriptions
Tenant Root Group	Management group	f16ea7d-29a0-409c-9525-2d2fdc2d631d	4
Azure subscription 1	Subscription	1f0b726b-4a28-465d-b087-4e7852156842	
governance	Management group	governance	2
Sub-a	Subscription	595d7107-0a89-4e2f-84fb-7ec71eb18f31	
Sub-b	Subscription	65ec2b8a-3541-4c4b-ac58-0b813896e8be	
robert	Management group	rnkambwe	1

Compliance

The screenshot shows the 'Policy | Compliance' page in the Microsoft Azure portal. The left sidebar contains 'Overview', 'Getting started', 'Compliance', 'Remediation', 'Events', 'Authoring', 'Definitions', 'Assignments', and 'Exemptions'. The main content area displays compliance metrics and a table of non-compliant policies.

Overall resource compliance: 100% (6 out of 6)

Resources by compliance state: 6 - Compliant, 0 - Non-compliant

Non-compliant initiatives: 0 out of 1

Non-compliant policies: 0 out of 2

n01677712storage1

The screenshot displays the Microsoft Azure portal interface. At the top, the navigation bar shows 'Microsoft Azure' and a search bar. Below this, the breadcrumb trail indicates 'Home > Storage accounts > n01677712storage1'. The main content area is divided into two sections: 'Essentials' and 'JSON View'. The 'Essentials' section provides a summary of the storage account's configuration, including its resource group (RG1-n01677712), location (australiaeast), subscription ID (595d7107-0a89-4e2f-84fb-7ec71eb18f31), disk state (Available), and tags (environment: project). The 'JSON View' section shows the account's metadata, such as its type (Microsoft.Storage/storageAccounts), name (n01677712storage1), and creation/modification dates. The left sidebar contains a navigation menu with options like Overview, Activity log, Tags, Diagnose and solve problems, Access Control (IAM), Data migration, Events, Storage browser, Storage Mover, Data storage, and Security + networking.

n01677712storage2

The screenshot displays the Microsoft Azure portal interface for a storage account named **n01677712storage2**. The left-hand navigation pane includes links to Overview, Activity log, Tags, Diagnose and solve problems, Access Control (IAM), Data migration, Events, Storage browser, Storage Mover, Data storage, Security + networking, Data management, and Settings. The main content area is titled "Essentials" and provides a summary of the storage account's configuration. Below this, there are tabs for Properties, Monitoring, Capabilities (7), Recommendations (0), Tutorials, and Tools + SDKs.

Property	Value
Resource group	RG2-n01677712

VM1 Overview

The screenshot displays the Microsoft Azure portal interface for a virtual machine named **n01677712-w-vm1**. The left-hand navigation pane includes links to Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Connect, Bastion, Windows Admin Center, Networking, Settings, and Availability + scale. The main content area is titled "Essentials" and provides a summary of the virtual machine's configuration. Below this, there are tabs for Properties, Monitoring, Capabilities (7), Recommendations (0), Tutorials, and Tools + SDKs.

Property	Value
Resource group	RG1-n01677712
Status	Running
Location	Australia East
Subscription	Sub-a
Subscription ID	595d7107-0a89-4e2f-84fb-7ec71eb18f31
Operating system	Windows (Windows Server 2019 Datacenter)
Size	Standard D2s v3 (2 vcpus, 8 GiB memory)
Public IP address	4.200.57.30
Virtual network/subnet	vnet1/vnet1-subnet1
DNS name	n01677712-w-vm1.australiaeast.cloudapp.azure.com

VM1 Networking

The screenshot displays the 'Network settings' page for the virtual machine 'n01677712-w-vm1'. The left-hand navigation pane includes links for Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Connect, Bastion, Windows Admin Center, Networking, Network settings (selected), and Load balancing. The main content area features a search bar and a notification: 'This is a new experience. Please provide feedback'. Below this, a dropdown menu shows 'Network interface / IP configuration' with the selected item 'n01677712-w-vm1897 (primary) / ipconfig1 (primary)'. The settings are organized into two columns under the 'Essentials' section. The left column lists: Network interface (n01677712-w-vm1897), Virtual network / subnet (vnet1 / vnet1-subnet1), Public IP address (4.200.57.30), Private IP address (10.10.0.4), and Admin security rules (0 (Configure)). The right column lists: Load balancers (0 (Configure)), Application security groups (0 (Configure)), Network security group (-), Accelerated networking (Enabled), and Effective security rules (0).

Serial console

The screenshot shows the 'Serial console' page for the virtual machine 'n01677712-w-vm1'. The left-hand navigation pane includes links for Help, Boot diagnostics, and Serial console (selected). The main area displays a terminal window with the following text: 'Computer is booting, SAC started and initialized. Use the "ch -?" command for information about using channels. Use the "?" command for general help.' The terminal shows a series of commands and events: 'SAC>' followed by 'EVENT: A new channel has been created. Use "ch -?" for channel help. Channel: SACSetupAct', then 'SAC>' followed by 'EVENT: A new channel has been created. Use "ch -?" for channel help. Channel: SACSetupErr', then 'SAC>' followed by 'EVENT: A channel has been closed. Channel: SACSetupAct', then 'SAC>' followed by 'EVENT: A channel has been closed. Channel: SACSetupErr', and finally 'SAC>' followed by 'EVENT: The CMD command is now available.' The terminal ends with 'SAC>' and a cursor.

Availability Set

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The breadcrumb trail indicates the path: Home > Virtual machines > n01677712-w-vm1. The main heading is "n01677712-w-vm1 | Availability + scaling". On the left, a sidebar menu shows "Availability + scaling" selected. The main content area displays the "Essentials" section with the following details:

Property	Value
Status	Running
Location	Australia East
Availability zone	-
Fault domains	-
Update domains	-

Below the Essentials section, there are tabs for "Availability Zones", "Scaling", and "Availability set". The "Availability set" tab is active, showing the "Availability set profile" as "WINDOWS-AVS".

Extension Microsoft Antimalware

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The breadcrumb trail indicates the path: Home > Virtual machines > n01677712-w-vm1. The main heading is "n01677712-w-vm1 | Extensions + applications". On the left, a sidebar menu shows "Settings" selected, with "Extensions + applications" highlighted. The main content area displays the "Extensions" tab. A table lists the installed extensions:

Name	Type
AzurePerformanceDiagn...	Microsoft.Azure.Perf
HealthExtension	Microsoft.ManagedS
IaaS Antimalware	Microsoft.Azure.Sec
Microsoft.Insights.VMDi...	Microsoft.Azure.Diag

A context menu is open for the "IaaS Antimalware" extension, showing the following options:

- Status level
- Info
- Status message
- Microsoft Antimalware enabled
- Handler status
- Ready
- Handler status level
- Info
- Automatic upgrade status
- Not supported
- Resource ID

The "Status message" and "Microsoft Antimalware enabled" options are highlighted with a green circle.

Azure NetworkWatcherExtension

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The breadcrumb trail indicates the path: Home > Virtual machines > n01677712-u-vm1. The main heading is "n01677712-u-vm1 | Extensions + applications". On the left, a sidebar menu lists various options: Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Connect, Networking (with sub-items: Network settings, Load balancing, Application security groups, Network manager), and Settings. The "Extensions" tab is selected, showing a table with one item: "AzureNetworkWatcherE..." of type "Microsoft.Azure.Net...". To the right, a detailed view of the "AzureNetworkWatcherExtension" is shown, including options to "Enable automatic upgrade" and "Uninstall", and a list of properties: Type (Microsoft.Azure.NetworkWatcher.NetworkWatcherAgentLinux), Version (1.4.3320.1), Status (Provisioning succeeded), Status level (Info), and Status message (Default configuration is in effect).

Serial console

The screenshot shows the Microsoft Azure portal interface with the "Serial console" tab selected for the virtual machine "n01677712-u-vm1". The left sidebar menu is visible, with "Serial console" highlighted. The main area displays a terminal window with the following text:

```

VM2

The screenshot displays the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and the user profile 'n01677712@rnkambwe...'. The breadcrumb trail shows 'Home > Virtual machines > n01677712-u-vm2'. The left-hand navigation pane lists various management options: Overview (selected), Activity log, Access control (IAM), Tags, Diagnose and solve problems, Connect, Networking (expanded), Network settings, Load balancing, Application security groups, Network manager, and Settings. The main content area is titled 'n01677712-u-vm2' and shows the 'Overview' tab. It includes a toolbar with actions like Connect, Start, Restart, Stop, Hibernate, Capture, Delete, Refresh, and Open in mobile. The 'Essentials' section provides key information: Resource group (RG2-n01677712), Status (Running), Location (UK South), Subscription (Sub-b), and Subscription ID (65ec2b8a-3541-4c4b-ac58-0b813896e8be). The 'Operating system' is Linux (ubuntu 22.04), and the 'Size' is Standard B1s (1 vcpu, 1 GiB memory). The 'Public IP address' is 172.167.192.133, and the 'Virtual network/subnet' is vnet2/vnet2-subnet2. The 'DNS name' is n01677712-u-vm2.uksouth.cloudapp.azure.com, and the 'Health state' is -. The 'Time created' is 8/4/2024, 7:52 PM UTC. A 'Tags (edit)' link is also visible.

Networking

This screenshot shows the 'Networking' tab for the same virtual machine, n01677712-u-vm2. The left-hand navigation pane remains the same. The main content area now displays the 'Networking' section. It shows the 'Public IP address' as 172.167.192.133, associated with the network 'n01677712-' and interface 'u-vm2891'. The 'Private IP address' is 10.20.1.4. The 'Private IP address (IPv6)' is -. The 'Virtual network/subnet' is vnet2/vnet2-subnet2, and the 'DNS name' is n01677712-u-vm2.uksouth.cloudapp.azure.com. The 'Tags (edit)' section shows a tag 'environment : project'. The 'Properties' section lists details about the virtual machine: Computer name (n01677712-u-vm2), Operating system (Linux (ubuntu 22.04)), VM generation (V2), VM architecture (x64), Agent status (Ready), Agent version (2.11.1.4), Hibernation (Disabled), and Host group (-).

Availability and scale set

The screenshot displays the 'Overview' tab for a virtual machine in the Microsoft Azure portal. The left-hand navigation pane includes links to Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Connect, Networking (with sub-links for Network settings, Load balancing, Application security groups, and Network manager), and Settings. The main content area is divided into several sections: Host (listing Proximity placement group, Colocation status, Capacity reservation group, and Disk controller type), Azure Spot (listing Azure Spot and Azure Spot eviction policy), Availability + scaling (listing Availability zone and Availability set), Size (listing Size, vCPUs, and RAM), Source image details (listing Source image publisher, Source image offer, and Source image plan), and Disk (listing OS disk, Encryption at host, and Azure disk encryption). The URL at the bottom of the browser window is <https://portal.azure.com/#@rnkambweyaho.onmicrosoft.com/resource/subsc...>

Section	Property	Value
Host	Proximity placement group	-
	Colocation status	N/A
	Capacity reservation group	-
	Disk controller type	SCSI
Azure Spot	Azure Spot	-
	Azure Spot eviction policy	-
Availability + scaling	Availability zone (edit)	-
	Availability set	LINUX-AVS
Size	Size	Standard B1s
	vCPUs	1
	RAM	1 GiB
Source image details	Source image publisher	canonical
	Source image offer	0001-com-ubuntu-server-jammy
	Source image plan	22_04-lts-gen2
Disk	OS disk	n01677712-u-vm2_OsDisk_1_ebbcde17acbb4b109647c3bbd709b307
	Encryption at host	Disabled
	Azure disk encryption	Not enabled

Extension

The screenshot displays the 'Extensions + applications' tab for a virtual machine in the Microsoft Azure portal. The left-hand navigation pane is identical to the previous screenshot. The main content area is divided into two sections: 'Extensions' and 'VM Applications'. The 'Extensions' section shows a search bar, a list of extensions (currently showing 1 item), and a table with columns 'Name' and 'Type'. The 'VM Applications' section shows a search bar and a list of applications. The 'AzureNetworkWatcherExtension' is highlighted, and its details are shown on the right. The details include the extension name, type, version, status, status level, and status message.

Name	Type
AzureNetworkWatcherE...	Microsoft.Azure.Net...

AzureNetworkWatcherExtension

Status message: Provisioning succeeded

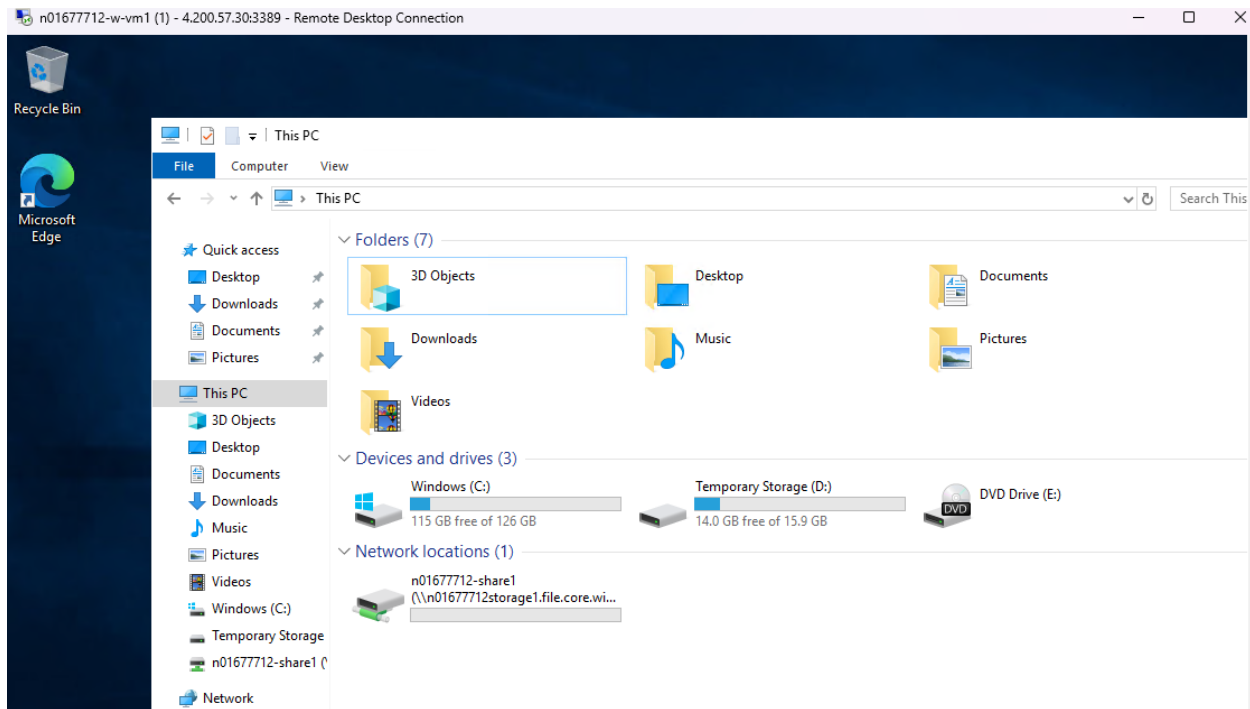

Private end-point Overview

The screenshot shows the 'Overview' page for a private endpoint named 'n01677712-endpoint'. The breadcrumb navigation is 'Home > Private Link Center | Private endpoints > n01677712-endpoint'. The page title is 'n01677712-endpoint' with a star icon and a close button. Below the title is a search bar and a 'Delete' button. The left sidebar contains a list of navigation options: Overview (selected), Activity log, Access control (IAM), Tags, Diagnose and solve problems, Settings, Monitoring, Automation, and Help. The main content area is divided into two columns. The left column, titled 'Essentials', lists properties: Resource group (rg1-n01677712), Location (Australia East), Subscription (Sub-a), Subscription ID (595d7107-0a89-4e2f-84fb-7ec71eb18f31), Provisioning state (Succeeded), and Tags (environment: project). The right column, titled 'JSON View', lists properties: Virtual network/subnet (vnet1/vnet1-subnet1), Network interface (n01677712-endpoint-nic), Private link resource (n01677712storage1), Target sub-resource file, Connection status (Approved), Request/Response (Auto-Approved), and a 'JSON View' link.

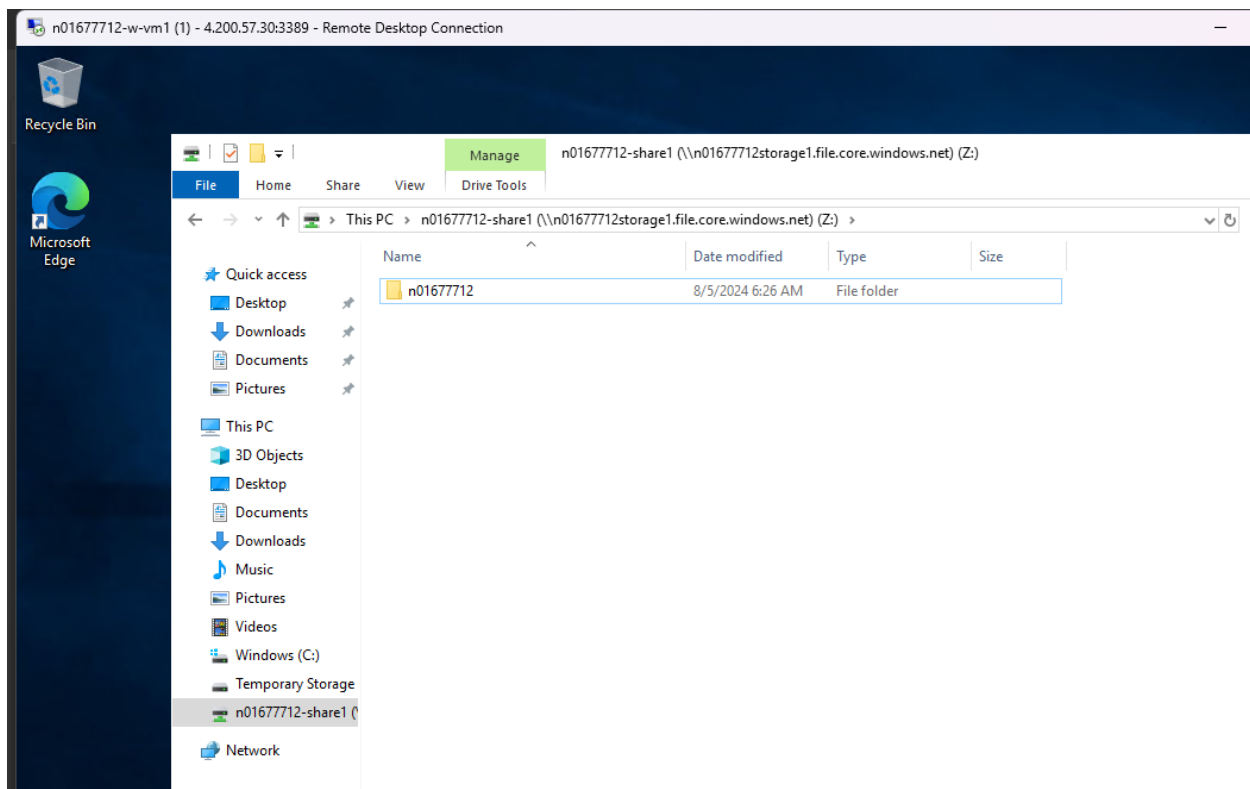

IP configuration of the private end point

The screenshot shows the 'IP configuration' page for the private endpoint 'n01677712-endpoint'. The breadcrumb navigation is 'Home > Private Link Center | Private endpoints > n01677712-endpoint > n01677712-endpoint-nic'. The page title is 'n01677712-endpoint-nic' with a star icon and a close button. Below the title is a search bar and a 'Delete' button. The left sidebar contains a list of navigation options: Overview (selected), Activity log, Access control (IAM), Tags, Settings, Monitoring, Automation, and Help. The main content area is divided into two columns. The left column, titled 'Essentials', lists properties: Resource group (RG1-n01677712), Location (Australia East), Subscription (Sub-a), Subscription ID (595d7107-0a89-4e2f-84fb-7ec71eb18f31), Accelerated networking (Disabled), Virtual network/subnet (vnet1/vnet1-subnet1), and a 'JSON View' link. The right column, titled 'JSON View', lists properties: Private IPv4 address (10.10.0.5), Public IPv4 address (-), Private IPv6 address (-), Public IPv6 address (-), Attached to (n01677712-endpoint (Private endpoint)), Type (Regular), and a 'JSON View' link.

Load Balancer Overview

The screenshot shows the Microsoft Azure portal interface. The breadcrumb navigation at the top reads: Home > Load balancing | Load Balancer > n01677712-lb. The page title is "n01677712-lb" with the subtitle "Load balancer". On the left, there is a sidebar menu with options: Overview (selected), Activity log, Access control (IAM), Tags, Diagnose and solve problems, Settings, Frontend IP configuration, Backend pools, Health probes, Load balancing rules, Inbound NAT rules, and Outbound rules. The main content area is titled "Essentials" and contains two columns of information. The left column lists: Resource group (RG1-n01677712), Location (Australia East), Subscription (Sub-a), Subscription ID (595d7107-0a89-4e2f-84fb-7ec71eb18f31), and SKU (Standard). The right column lists: Backend pool (backendpool (2 virtual machines)), Load balancing rule (lb-rule (Tcp/80)), Health probe (healthprobe1 (Tcp:80)), NAT rules (0 inbound), Tier (Regional), and Public IP address (4.200.49.112 (lbip)). At the bottom of the Essentials section, there is a "Tags" section with the tag "environment : project".

Front end Ip configuration

The screenshot shows the "Frontend IP configuration" page for the Load Balancer resource "n01677712-lb". The breadcrumb navigation at the top reads: Home > Load balancing | Load Balancer > n01677712-lb | Frontend IP configuration > frontend-IP1. The page title is "frontend-IP1" with the subtitle "n01677712-lb". The "IP type" section has two radio buttons: "IP address" (selected) and "IP prefix". The "Public IP address" section has a dropdown menu showing "lbip (4.200.49.112)" and a "Create new" link. The "Gateway Load balancer" section has a dropdown menu showing "None". The "Used by" section contains a description: "The list of load balancing rules, inbound NAT rules, inbound NAT pools, and outbound rules using this IP address." Below this is a table with two columns: "Name" and "Type". The table contains one row: "lb-rule" and "Load balancing rule".

Backend pools

The screenshot shows the 'Backend pools' page in the Azure portal. The left sidebar contains navigation links: Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Settings (Frontend IP configuration, Backend pools, Health probes, Load balancing rules, Inbound NAT rules), and a search bar. The main content area has a title 'n01677712-lb | Backend pools' and a description: 'The backend pool is a critical component of the load balancer. The backend pool defines the group of resources that will serve traffic for a given load-balancing rule. [Learn more.](#)' Below the description is a table with columns: Backend pool, Resource Name, IP address, Network interface, Availability zone, Rules count, Resource Status, and Admin state. The table lists two backend pools, both named 'backendpool', associated with VMs 'n01677712-w-vm' at IP addresses '10.10.0.4' and '10.10.1.4', both in 'Running' status. An 'Add' button is visible above the table.

Backend pool	Resource Name	IP address	Network interface	Availability zone	Rules count	Resource Status	Admin state
backendpool (2)							
backendpool	n01677712-w-vm	10.10.0.4	n01677712-w-vm	-	1	Running	None
backendpool	n01677712-w-vm	10.10.1.4	n01677712-w-vm	-	1	Running	None

Health Probe

The screenshot shows the 'Health probe' configuration page in the Azure portal. The left sidebar is the same as the previous screenshot. The main content area has a title 'healthprobe1' and a description: 'Health probes are used to check the status of a backend pool instance. If the health probe fails to get a response from a backend instance then no new connections will be sent to that backend instance until the health probe succeeds again.' Below the description is a form with the following fields: Name (healthprobe1), Protocol (TCP), Port (80), Interval (seconds) (5), and Used by (lb-rule).

Backup Center | Backup Instances

The screenshot shows the Microsoft Azure Backup Center interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The main header is 'Backup center | Backup instances'. Below this, there's a search bar and a set of filters: 'Datasource type == Azure Virtual machines', 'Vault == All', 'Protection status == All', and 'Tags == All'. A checkbox option 'Only show information about datasources which I have access to' is also present. The main content area displays a table with 2 items. The table has columns for 'Datasource subs...', 'Datasource reso...', 'Datasource loca...', 'Latest restore p...', 'Vault', and 'Protection status'. The first two rows of data are visible, both showing 'Sub-a' as the datasource, 'RG1-n01677712' as the resource group, 'Australia East' as the location, and '12/31/2000, 7:00:00 ...' as the latest restore point. The vault is 'n01677712-rsv1' and the protection status is 'Protection config...'.

	Datasource subs...	Datasource reso...	Datasource loca...	Latest restore p...	Vault	Protection status
11	Sub-a	RG1-n01677712	Australia East	12/31/2000, 7:00:00 ...	n01677712-rsv1	Protection config...
12	Sub-a	RG1-n01677712	Australia East	12/31/2000, 7:00:00 ...	n01677712-rsv1	Protection config...

Container instance overview

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The main content area displays the 'Container instances' overview for the resource 'n01677712aci'. On the left, a sidebar lists various management options like Activity log, Access control, Tags, Settings, Containers, Identity, Properties, Locks, Monitoring, Automation, and CLI / PS. The central pane shows the 'Essentials' section with key properties: Resource group (RG2-n01677712), Status (Succeeded), Location (UK South), Subscription ID, SKU (Standard), OS type (Linux), IP address (4.158.43.182), FQDN, and Container count (1). A 'JSON View' link is available. On the right, a 'Notifications' panel shows three recent events: 'Successfully started container instances' (twice) and 'Deployment succeeded', all indicating successful operations.

DNS Labelled accordingly

This screenshot displays the 'Resource JSON' view for the same container instance. The left sidebar is similar to the previous view but includes 'Metrics', 'Alerts', 'Tasks (preview)', and 'Export template'. The central pane shows the JSON representation of the resource. A green checkmark is placed next to the 'dnsNameLabel' field in the 'instanceView' section, which is 'n01677712-aci'. The 'tags' field is also visible, containing the value 'project'. The right pane shows the 'API Versions' dropdown set to '2019-12-01'.

DNS Label in browser: **n01677712-aci**.ejdebgw5bkejgmh6.uksouth.azurecontainer.io
